

EZorb Calcium® - Calcium Aspartate Anhydrous

Medical Proof

In August of 2004 DR Best, MD called me and said my DEXA scan was back, that I had severe Osteoporosis in my right hip. He needed me to come in so we could discuss the options, which weren't many. After leaving his office with a prescription for Fosamax® in hand the shock finally wore off and reality finally sunk in. The chances of a broken hip were very high, my independence would be gone forever. I would have to have people help me do even simple things that I now do as I had to do for my mother after she ended up with a broken hip and past on about two years later. This is a scary feeling, its women that get osteoporosis not men!

I got on the Internet for side effects of all drugs available. After reading about the bad side effects I thought you must be kidding a sane person is supposed to take this stuff. There has got to be something else somewhere in this world better than these drugs. After several days of searching I found EZorb Calcium and after reading all of the information I printed the information for medical personal. I called DR Best and told him I found something that I would like him to read about, that I would rather take than drugs, he said come in about 4:00 PM. He read the material and said what they are saying is correct, if you want to try it let's do it.

I have been taking EZorb and nothing else except for a baby aspirin everyday since and you can see the results in just 7 months. In September 2005 DR Best sent me for my third DEXA scan again showing more improvement. You need to have a DEXA scan every six months to insure the recommended dosage is correct for your body, we now have had two since the first and both show positive increases. Now I can wait a year or more until I get another. Anyone 50 years old needs to have a DEXA scan so the silent killer won't sneak upon you. I now have some customers that are in there 40 with osteoporosis so don't wait until it is too late to do anything about it.

The MD's at EZorb said the longer you take EZorb the stronger your bones & joints will get eventually back to 30 year old bones. We estimate in 13-15 months I should be close to that. It is now February 2006 and all of my lower back pain has gone away. My height is now back to 71.5 inches which shows that the intervertebral disks have been or being repaired. It took years for my body to get into this shape and it will take a couple of years or more to get back to normal. What God created he also provided a way for it to heal itself, it is up to you to feed your body the correct food. EZorb calcium is the correct food for your bones, joints & muscles!

The Doctors at EZorb are correct I had my 4th DEXA scan on November 28, 2006 after many months of waiting and I am finally back to healthy normal bones. All of my DEXA scans are here and now several other of Dr Best patients for you to see the real proof. I never once took any of the Bisphosphonates drugs. EZorb is not some magic dust in a bottle claiming to do all kinds of things. EZorb is only 100% pure organic calcium the kind your body will absorb and the medical community has know for years that calcium will prevent osteoporosis, look at the National Osteoporosis Foundation web site. It doesn't take rocket science to figure out that osteoporosis problems are caused by starving ones body of calcium and finally the store house is empty. So people take EZorb and fill up your bones with calcium. Another thing some say you can go on the maintenance dosage after getting back to normal bones well it took too long to get here and I will not take a chance of sliding backwards for less than the cost of one soft drink or ice tea a day.

EZorb Calcium® - Calcium Aspartate Anhydrous

Medical Proof

You to can have similar results on EZorb Calcium. DR Best is now recommending EZorb to his other patience's and obtaining similar results. If your doctor is a disbeliever show him my DEXA scans and have him contact us at this phone number 432-689-7272. We now have an EZorb Calcium Product Information and Treatment Procedures for Medical Professionals.

DR. Best is not paid or has not ever been paid by EZorb Calcium or has any financial connection with EZorb or a spokesperson for EZorb. DR. Best MD is my primary care physician and has an open mind, knows a good product when he see real medical results with his patients. DR Best has many of his patients now taking EZorb Calcium and some have agreed to allow their DEXA scans being place on this web site for your use.

One other interesting thing to think about, Elixir Industry released EZorb Calcium in year 2000 their first retail product. Here it is May 27, 2007 and they have just announced the release of Marvlix their second product. Elixir is not like other company's just after a fast buck. Elixir will only release a product for sale after years of research and it has finally been proven to work on humans.

I sure hope this helps some of you make up your mind and get serious about getting rid of osteoporosis or other calcium related conditions. Call me any time (432-689-7272) and I will be glad to answer any of your questions or buy three bottles and get started on the road of recovery as thousand of other customers have. I have some of my oldest customers on their 38th order and they would not still be ordering EZorb if it didn't work. For the rest of you doubters keep on looking for that magic dust in a bottle or buy some that super magic sea weed from South America, or convince yourself that Sally Fields knows what she is talking about, we will still be here when you are serious about getting rid of your osteo problems. Please don't wait until its too late.

Thank you,

Larry Penny
